RoHS Compliance Statement

Directive 2011/65/EU – RoHS recast (a.k.a. RoHS 2)

4/03/2013

Dear Valued Customer:

Custom Coils is committed to be in compliance with all applicable global environmental regulations. The European Union has developed a directive to restrict hazardous substances in electrical and electronic equipment (Directive 2002/95/EC - Restriction of Hazardous Substances in Electrical and Electronic Equipment). The requirements for complying with this directive are to eliminate or restrict the levels of six hazardous substances listed below.

Substance	Maximum Concentration Level
Lead (Pb)	0.1% by weight
Mercury (Hg)	0.1% by weight
Cadmium (Cd)	0.01% by weight
Hexavalent Chromium (Cr+6)	0.1% by weight
Polybrominated Biphenyls (PBB)	0.1% by weight
Polybrominated Diphenyl Ethers (PBDE)	0.1% by weight

In July of 2011 the European Union recast Directive 2002/95/EC (now known as RoHS 1) as Directive 2011/65/EU (now known as RoHS 2). Under this new directive the same prevention methods are called out. (See Article 4(1) & 4(2) for details.) Also, the substances listed above and their maximum concentration values have stayed the same. (See Annex II for details.) As of January 3, 2013 Directive 2002/95/EC was repealed and now Directive 2011/65/EU is in effect as of that date. Until all of Custom Coils web content and documentation can be properly updated to reference the new 2011/65/EU, Custom Coils defines its compliance to RoHS Directive 2002/95/EC (RoHS 1) as being compliant to recast RoHS Directive 2011/65/EU (RoHS 2).

Custom Coils hereby certifies that all products that are identified as “RoHS Compliant” fulfill those requirements as defined under Directive 2011/65/EU of The European Parliament. All parts shipped as RoHS compliant are accompanied by a specific RoHS/Certificate of Conformance.
